注意：本产品为可回收产品，可二次回收
 Note: this product is a recycled product, can the secondary recover

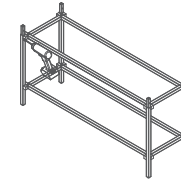

1. 先找出以上三种配件
 1. To find out the above three parts

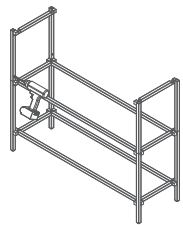

2. 用螺丝和电批通过M6沉头螺丝将BC-DB和BC-HG连接固定
 2. Using screws and electricity screw driver passed the M6 countersunk head screws, connected the BC - DB and BC - HG and fixed

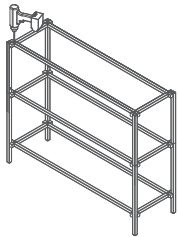

3. 通过扳手将螺丝拧紧
 3. Using the spanner tightened the screw

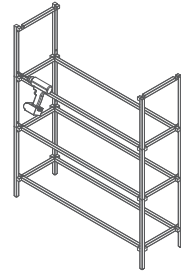

4. 用电批和M6螺丝将装好框架和BC-MZ相连 (重复步骤②拧紧)
 4. Using the Electricity screw driver and M6 screw, installed the framework and connected to BC - MZ (repeat step (2) and tighten)

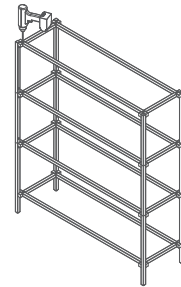

5. 用电批和M6螺丝将装好框架和BC-MB相连 (重复步骤②拧紧)
 5. Using the Electricity screw driver and M6 screw, installed the framework and connected to BC - MB(repeat step (2) and tighten)

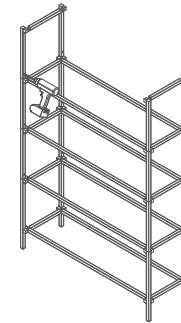

6. 用螺丝和电批通过M6沉头螺丝将现有框架和BC-HG连接固定 (重复步骤②拧紧)
 6. Using screws and electricity screw driver passed the M6 countersunk head screws, connected BC - HG and fixed

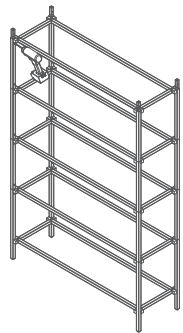

7. 用电批和M6螺丝将装好框架和BC-MB相连 (重复步骤②拧紧)
 7. Using the Electricity screw driver and M6 screw, installed the framework and connected to BC - MB(repeat step (2) and tighten)

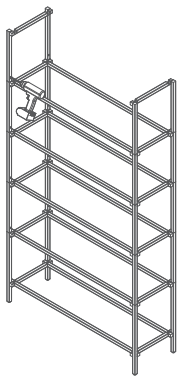

8. 用螺丝和电批通过M6沉头螺丝将现有框架和BC-HG连接固定 (重复步骤②拧紧)
 8. Using screws and electricity screw driver passed the M6 countersunk head screws, connected BC - HG and fixed

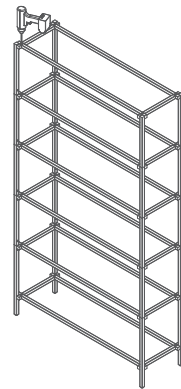

9. 用电批和M6螺丝将装好框架和BC-MB相连 (重复步骤②拧紧)
 9. Using the Electricity screw driver and M6 screw, installed the framework and connected to BC - MB(repeat step (2) and tighten)

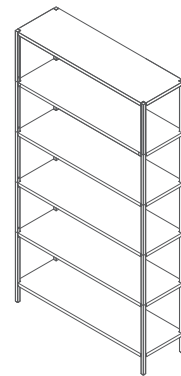

10. 用电批和M6螺丝将装好框架和BC-MZ相连 (重复步骤②拧紧)
 10. Using the Electricity screw driver and M6 screw, installed the framework and connected to BC - MZ (repeat step (2) and tighten)

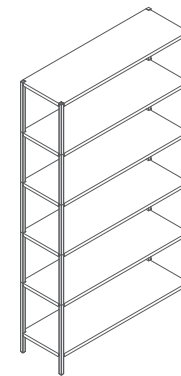

11. 用电批和M6螺丝将装好框架和BC-UB相连 (重复步骤②拧紧)
 11. Using the Electricity screw driver and M6 screw, installed the framework and connected to BC - UB(repeat step (2) and tighten)

12. 用电批和M6螺丝将装好框架和BC-HG相连 (重复步骤②拧紧)
 12. Using screws and electricity screw driver passed the M6 countersunk head screws, connected BC - HG and fixed

13. 把BC-CB放在装好框架上
 13. Placing the BC - CB on the installed frame
